ARK WOODWORKS
QUALITY CRAFTSMANSHIP

COMPANY PROFILE · 2026

Woodwork, made in our own workshop.

Kitchens, wardrobes, doors, wall systems and CNC carving for homes, offices and developments across Islamabad and Rawalpindi.

SINCE 2019

250+ PROJECTS

A manufacturer first, so every detail stays in our hands.

Our team has been designing, building and installing woodwork across Islamabad and Rawalpindi since 2019, with more than 250 projects delivered.

ARK Woodworks brings that experience under one roof: our own workshop on Main GT Road, Islamabad, with a sliding table panel saw, an automatic edge bander with pre-milling and corner rounding, and a CNC router. Kitchens, wardrobes, doors, feature walls and complete turnkey woodwork are cut, edged, carved and finished in-house, then installed by our own team.

That control is what lets us promise three things: a furniture-grade finish, an accurate fit, and a handover date we keep.

2019	250+	3	15
BUILDING SINCE	PROJECTS DELIVERED	INDUSTRIAL MACHINES	CRAFTSMEN ON OUR TEAM

01

Furniture-grade finish

Machine-cut panels, sealed edges and workshop finishing.

02

An accurate fit

Measured on site, built to the millimetre, fitted by our team.

03

A date we keep

Production planned in our own workshop, not left to outside suppliers.

OUR WORKSHOP, MAIN GT ROAD

MANUFACTURING FACILITY

Our workshop

Everything we install is made here, under our own roof.

A dedicated production facility on Main GT Road, set up for precise panel cutting, edge banding, CNC carving and finishing. Boards arrive here as raw sheets and leave as finished kitchens, wardrobes, doors and wall panels, ready for installation by our own team.

Clients and contractors are welcome to visit, see work in progress and check materials before production starts.

01

Cutting

Boards sized on the panel saw.

02

Edge banding

Every visible edge sealed by machine.

03

CNC

Carving, grooves and patterns.

04

Finishing

Paint, polish and final checks.

ADDRESS

Shahzain Plaza, opp. DHA Gate 2, Main GT Road, Islamabad

COVERED AREA

1 kanal, approx. 5,400 sq ft

MACHINERY

Machines that make the difference

Machine-cut and machine-edged panels are what separate factory-grade woodwork from site-made carpentry: square corners, sealed edges and units that match exactly.

Sliding table panel saw	Square, accurate cuts on MDF, HDF, plywood and laminated boards.
Automatic edge bander	Pre-milling and corner rounding for sealed, durable edges.
CNC router	Carving, jali, grooves, arches and lettering.
Thickness planer	Solid wood planed to exact, even thickness.
Sliding mitre saw	Clean angled cuts for frames, mouldings and trims.
Dust extraction	A cleaner shop floor and a better finish.

THICKNESS PLANER

OUR TEAM

Made and fitted by our own people

Our craftsmen run the machines, finish every piece and install it on site. No outsourcing and no hand-offs between contractors, so one team is responsible from the first cut to the handover.

WHAT WE DO

Services

One team for design, manufacturing and installation, for homes, offices and developments.

01 Modular kitchens

Base, wall and tall units, islands, pull-outs and lift-ups.

02 Wardrobes and walk-ins

Hinged, sliding and glass walk-in closets.

03 Solid wood doors

Panel, carved, fluted and flush doors with frames.

04 Main entrance doors

Carved double doors and arched entrances.

05 Bed and media walls

Fluted, upholstered and lit statement walls.

06 Wall panelling

Fluted, PVC, MDF and UV-sheet cladding.

07 CNC carving and jali

Carved panels, screens, grooves and lettering.

08 Turnkey woodwork

Every wooden element of a home or office.

SPECIFICATIONS

Materials, finishes and hardware

Chosen to match your budget and how the space will be used. Exact boards, thicknesses and fittings are confirmed in each BOQ.

BOARDS AND WOOD

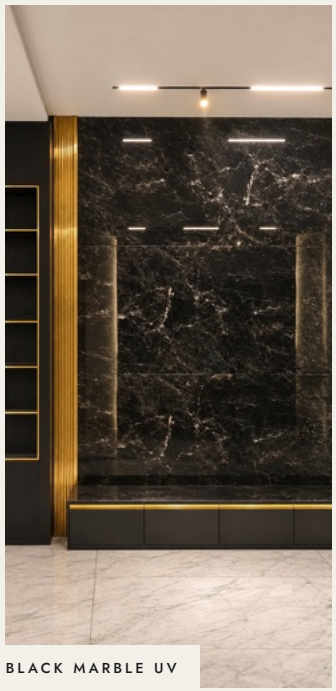

- **HDF** 15 to 16 mm
- **MDF** 16 mm, plain, stone and wood texture
- **Plywood** for structure and wet areas
- **Solid wood** Deodar, Kail, Partal (pine)
- **PVC** panels and mouldings

FINISHES

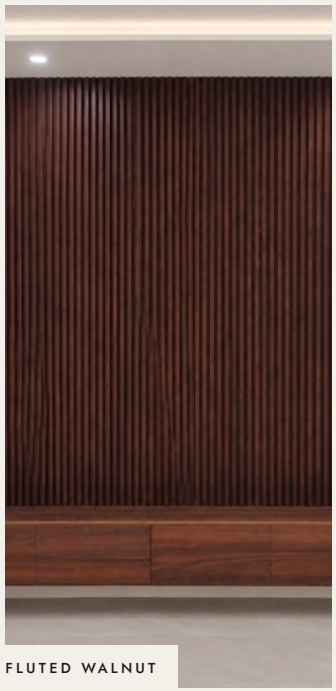

- **Duco paint** matt, semi-matt, gloss
- **UV high-gloss** sheets, marble and solid
- **Melamine polish and lacquer** on wood
- **Brass and aluminium** profiles
- **LED profile** and back-lighting

HARDWARE AND TOPS

- **Blum** hinges, channels, lift systems
- **J&I** fittings
- **Pull-out baskets** and lift-up flaps
- **Quartz, Corian, granite** tops

HOW WE WORK

From first visit to handover

01
Site visit
Our technical team measures on site and understands the brief and budget.

02
3D design
Layouts and 3D views to approve the look, sizes and materials.

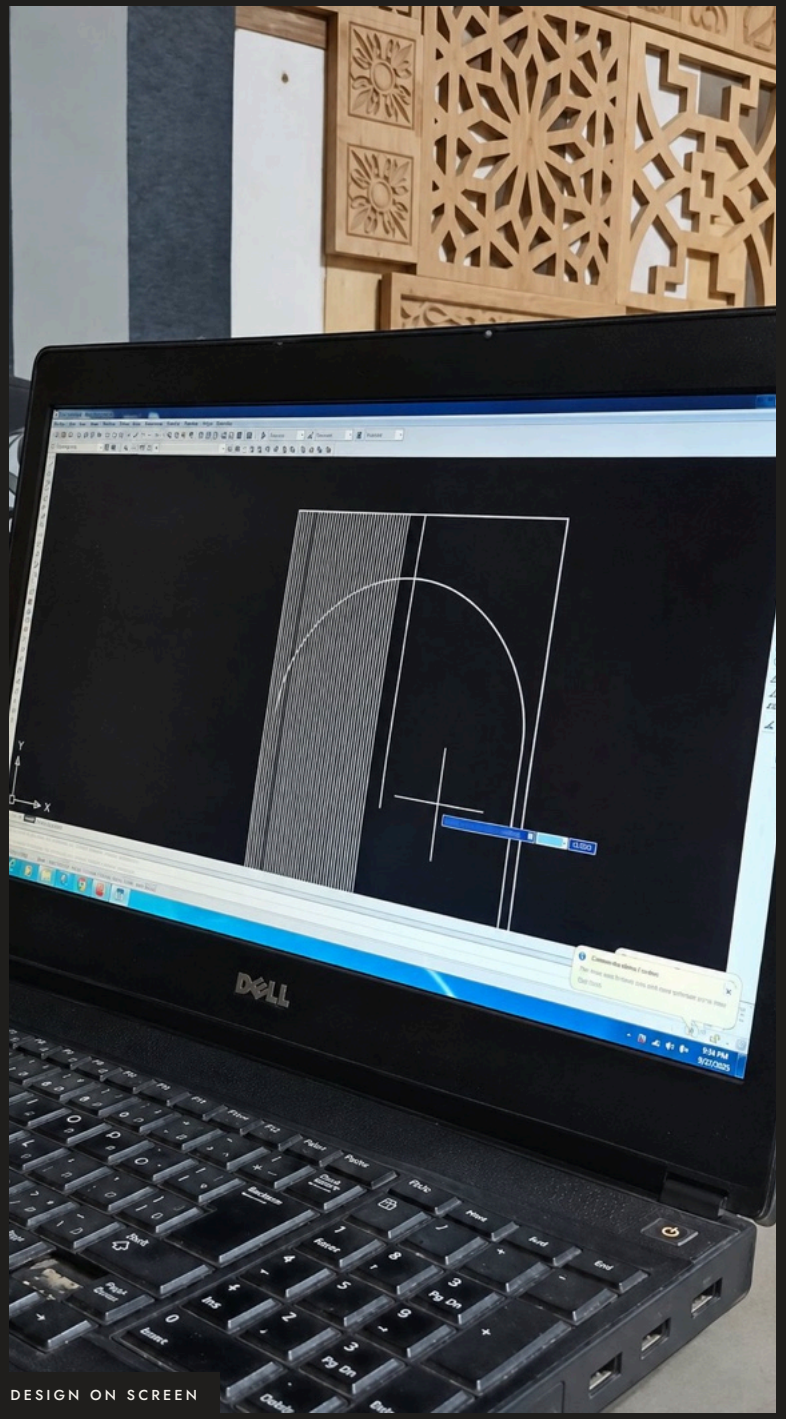

03
BOQ and proposal
Detailed bill of quantities, specifications, price and timeline.

04
Manufacturing
Cutting, edging, CNC and finishing in our workshop, with checks at each stage.

05
Installation
Fitted by our own team, planned around the site and other trades.

06
Handover
We check the full work with you and fix any small issues before we hand over.

TYPICAL TIMELINES	Single kitchen	Complete home	Bulk projects
	4 to 5 days	**6 to 10 weeks, by size**	**Phased schedule**

DESIGN ON SCREEN

3D DESIGN

See it before we build it.

Every project starts as a layout and a 3D view. You see proportions, colours, lighting and materials in your actual space, and approve them before a single board is cut.

For developers, the same drawings feed the BOQ and production files, so what is approved is exactly what is manufactured. Carving and CNC files are prepared in ArtCAM and VCarve.

3D CONCEPT RENDER

DOORS

Solid wood doors, made in our workshop

From carved main entrances to panel and flush doors for apartments, every door is built, carved and finished in-house, then fitted by our team.

WOOD
Deodar, Kail, Partal (pine)

TYPES
Carved, panel, fluted, flush

FINISH
Melamine polish, lacquer, paint

SUPPLY
Door, chowkat frame, fixing

SOLID PINE DOOR

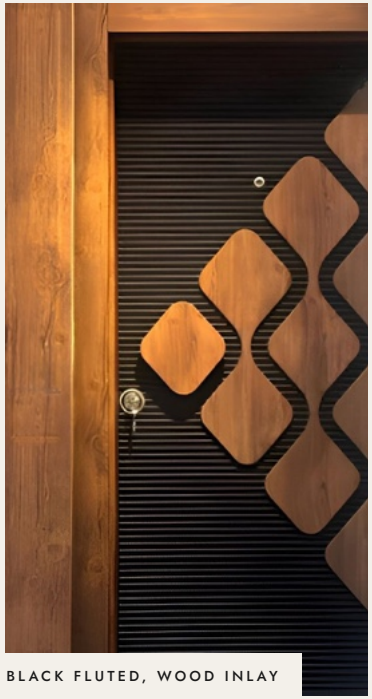

DOOR DESIGNS

Modern doors, built to the drawing

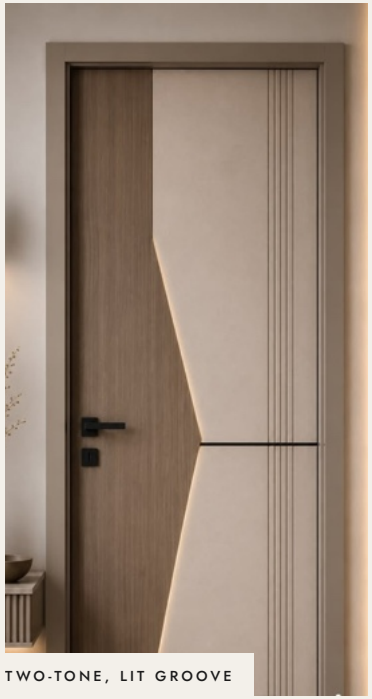

Alongside carved and traditional doors, we build modern fluted, grooved and inlay designs. Pick a style from here or bring your own reference. We draw it, cut the grooves and inlays on our CNC, and finish it to match your interiors.

FLUTED, DIAMOND INLAY

BLACK FLUTED, WOOD INLAY

TWO-TONE, LIT GROOVE

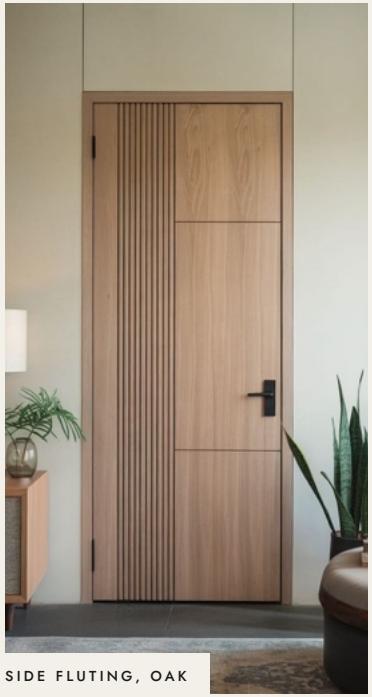

CURVED GROOVE LINES

FLUTED PANELS

CENTRE FLUTING

SIDE FLUTING, OAK

DARK FLUTED, FULL HEIGHT

SUPPLY
Door, frame and fitting

Design references shown. Every door is made to your opening size and finish.

CNC DESIGN AND CARVING

Drawn on screen, cut to the millimetre

Carvings, jali, grooves, arches and lettering are designed on computer and cut on our CNC router, so every panel matches the approved design. Craftsmen then hand-finish each piece.

BOARDS
Solid wood, MDF, HDF

FINISH
Stain, lacquer, Duco paint

USES
Doors, wall art, masjid panels

CNC PROCESS

From drawing to finished wall

Every CNC piece starts as an exact drawing. Clients approve the design and size before anything is cut, so what arrives on site matches what was signed off.

01

Drawing

Pattern, calligraphy or lettering drawn to exact size in AutoCAD.

02

Machine files

Cutting depth and shapes set for the CNC machine in ArtCAM and VCarve.

03

Cutting

The CNC router cuts the panel, so every unit matches the drawing.

04

Hand finishing

Craftsmen sand, fill and finish each piece by hand.

05

Paint and light

Paint, stain or lacquer, with LED backlighting where the design needs it.

06

Installation

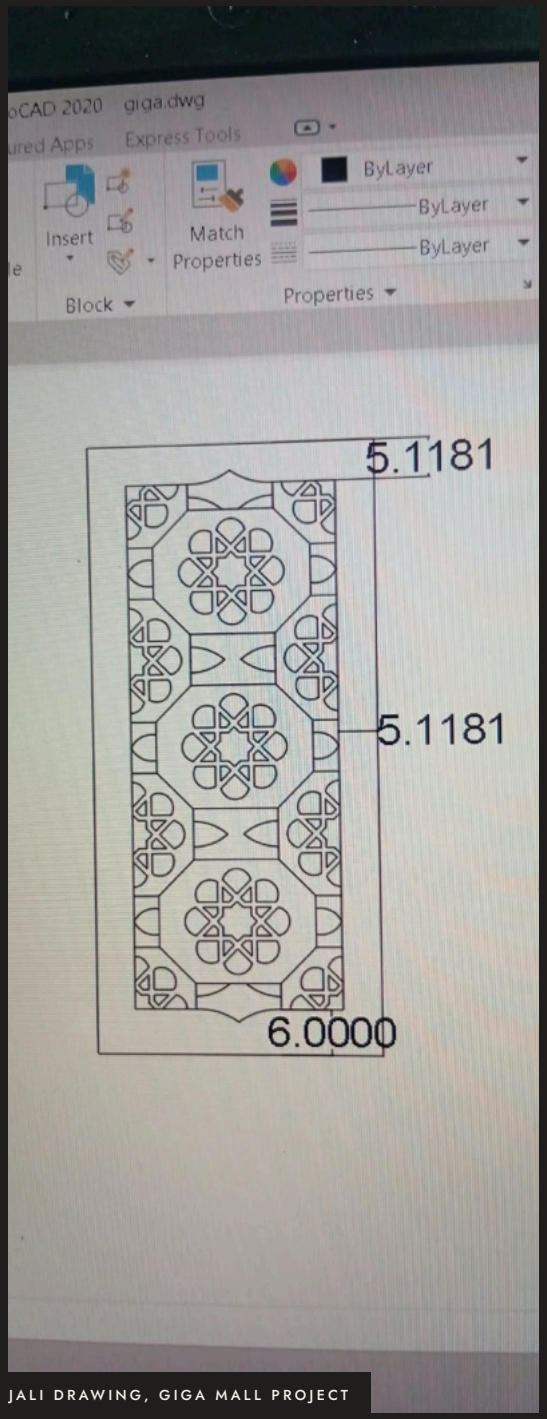

Fitted on site by our own team, aligned with walls, ceilings and joinery.

SOFTWARE
AutoCAD, ArtCAM, VCarve

07 Bed walls and panelling · Bahria Town Phase 8

01

SELECTED PROJECT

Kitchen and dresser

BAHRIA TOWN PHASE 8, OVERSEAS · RAWALPINDI

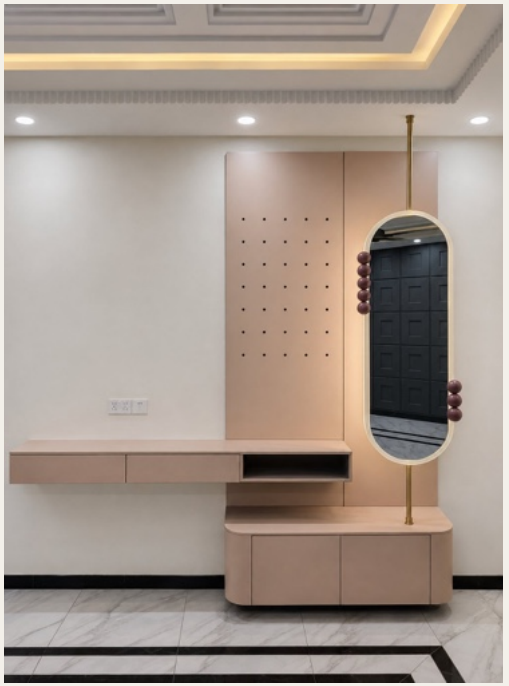

A full-height classic white kitchen with glass-front display cabinets, a built-in appliance wall and a curved black-top island, plus a matching dresser for the girls' room. Shutters were CNC-routed with grooves and raised panels, then finished in Duco paint.

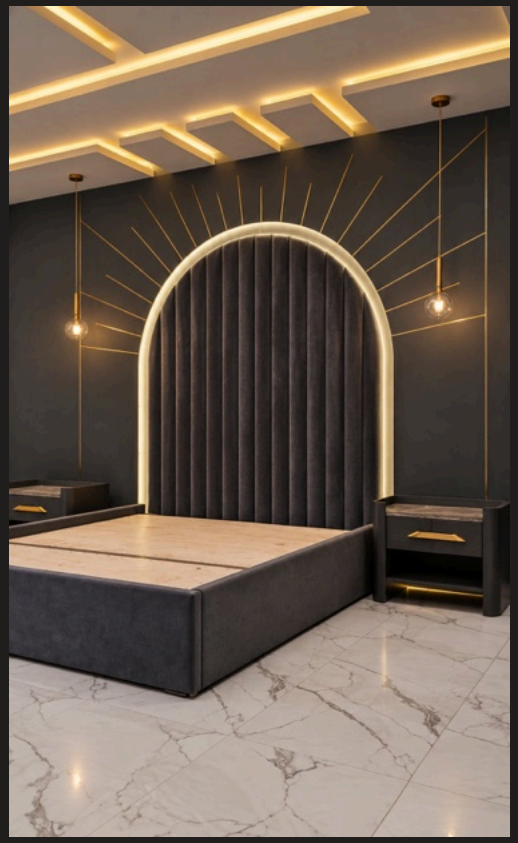

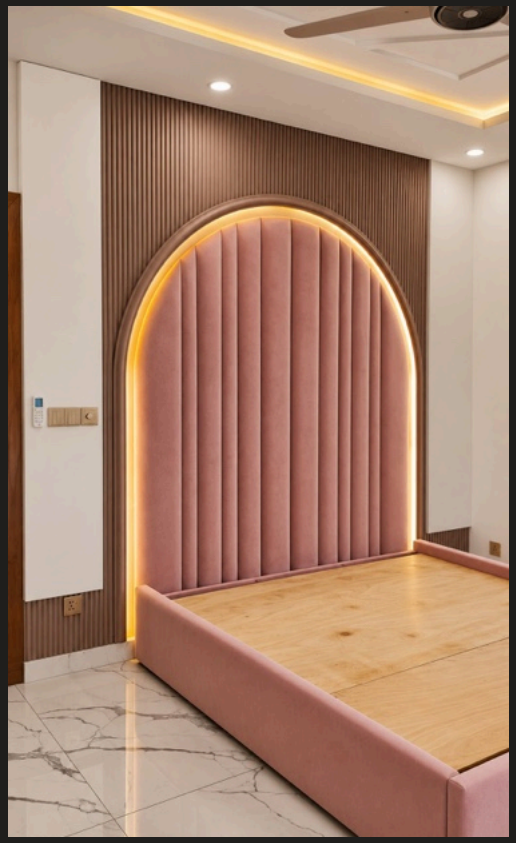

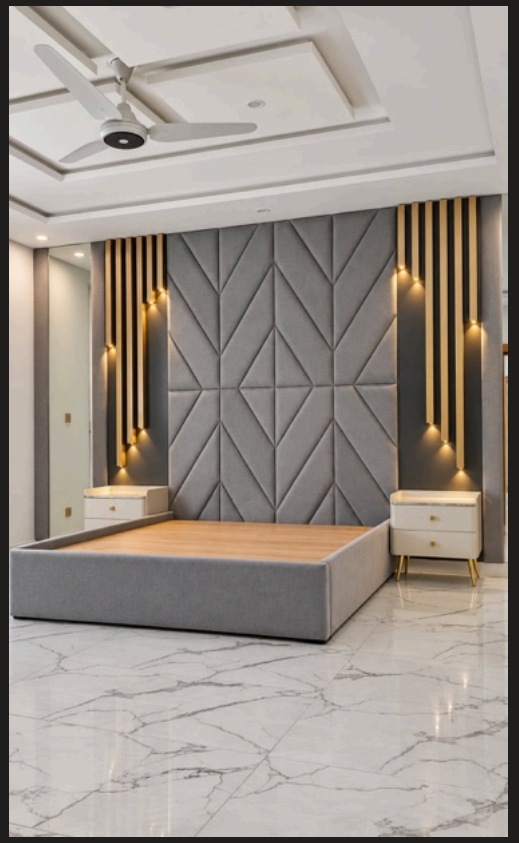

CLIENT	Private client
SCOPE	Kitchen with island, dresser
YEAR	2024
SERVICE	Manufacture, supply, install

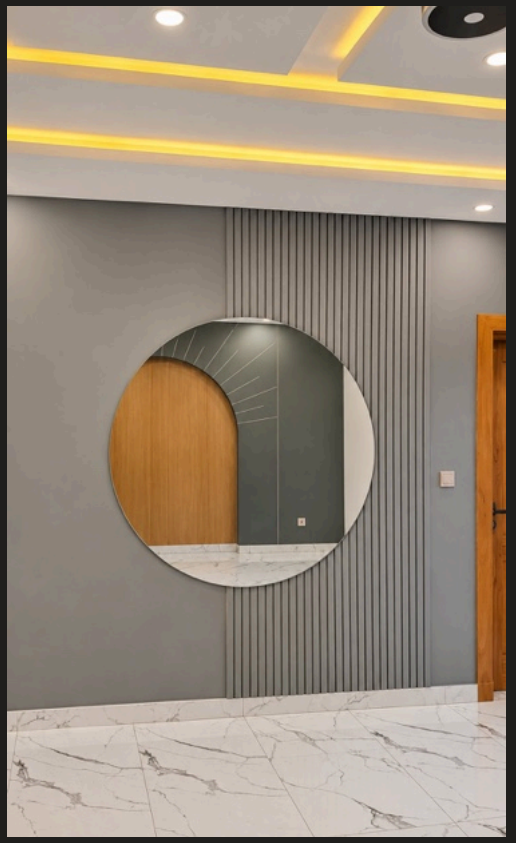

MATERIALS

MDF, Duco paint · CNC shutters · Corian top · Blum hardware

02

SELECTED PROJECT

Complete residence

BAHRIA TOWN PHASE 8, SECTOR F · RAWALPINDI · 2025

A whole-house interior designed by ARK. Each bedroom has its own statement bed wall, from arched upholstered headboards to chevron panelling framed with lit fluting, with furniture and media walls built to match.

CLIENT	Private client
SCOPE	Bed walls, media walls, beds, sofas
DURATION	2 to 3 months
SERVICE	Design, supply, install

MATERIALS

TAJ HDF, Partex plywood (15 and 10 mm) · Duco paint · 3M profile lighting

03

SELECTED PROJECT

A full home in 14 days

MIRPUR, AJK · 2025

Every piece was designed and built from scratch, including the Duco paint finishing, the most time-critical step, and the home was handed over in two weeks.

> The owner was out of the city, the site was far from our workshop, and the deadline was two weeks.

CLIENT	Private homeowner
SCOPE	Interiors, furniture, curtains
DURATION	2 weeks
SERVICE	Design, supply, install

MATERIALS

HDF and MDF 16 mm · matt Duco paint · French moulding · CNC grooves and arches · aluminium-glass

SELECTED PROJECT

Shahposh

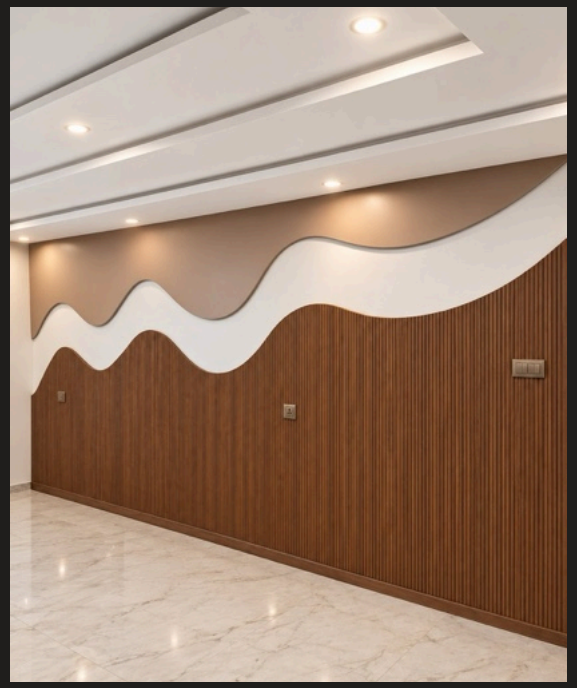

WESTRIDGE, RAWALPINDI · 2023

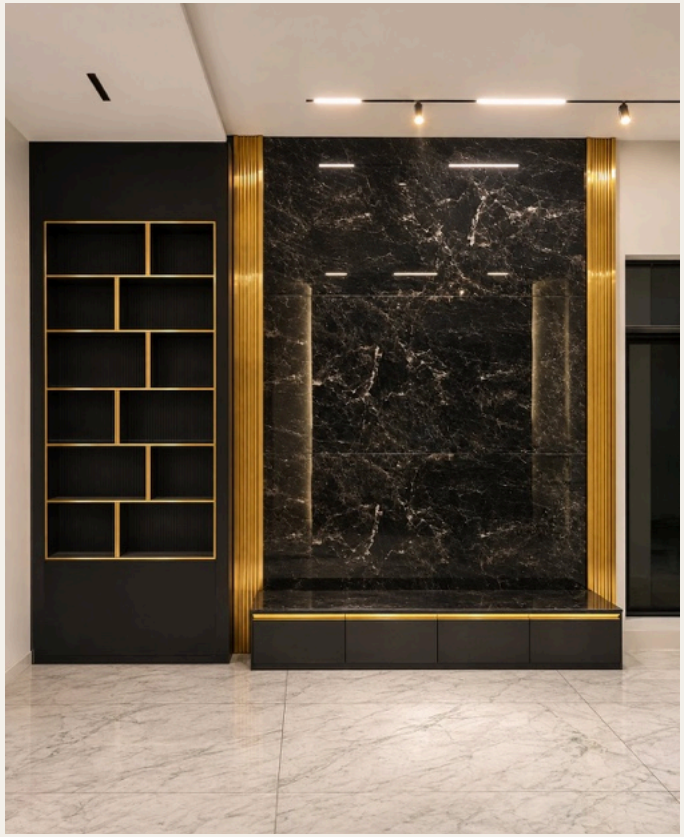

Designed in-house and delivered in a month: a mirrored dining wall with gold lattice and moulding, lit arched niches, and a 20-foot media wall in fluted walnut.

SCOPE	2 bed walls, dining, drawing, 20 ft media wall
DURATION	1 month

MATERIALS

TAJ HDF 15 mm · Duco paint

05

A dark, high-contrast scheme: full-height cupboards with aluminium-framed glass and integrated lighting, and tall bed and media walls in semi-matt black with brass fluted accents.

SELECTED PROJECT

Private residence

BAHRIA TOWN PHASE 8 · RAWALPINDI · 2025

CLIENT	Private client
SCOPE	Cupboards, bed wall, media wall
SERVICE	Manufacture, supply, install

MATERIALS

HDF 15 mm · semi-matt black Duco paint · brass fluted panels · aluminium-framed glass

06

SELECTED PROJECT

Media and study walls

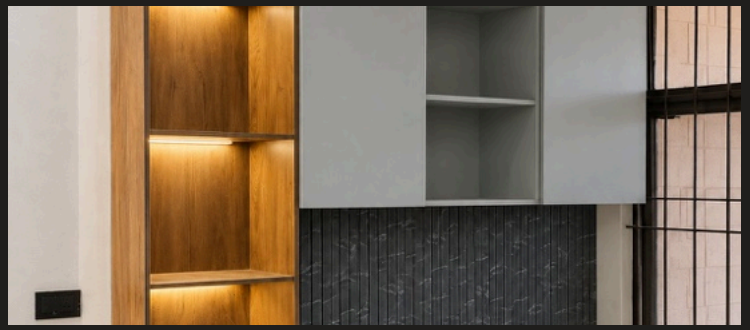

G-10, ISLAMABAD · 2025

A stone-look high-gloss media wall framed by lit open shelving, and a study wall pairing warm wood-texture shelves with grey storage and a floating desk.

CLIENT	Private client
SCOPE	Media wall, study and storage
SERVICE	Manufacture, supply, install

MATERIALS

ZRK UV Lux high-gloss · wood-texture MDF · J&I hardware · profile lighting

07

SELECTED PROJECT

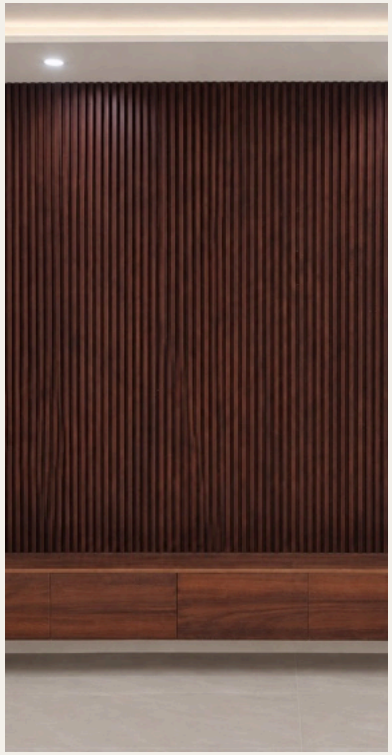

Bed walls and panelling

BAHRIA TOWN PHASE 8 · RAWALPINDI · 2025

Three bed walls in PVC panels and moulding with luxury emulsion, Al-Noor stone-texture MDF with black aluminium U-profiles, and a fourth bed wall in ZRK marble UV sheet with wood-texture MDF and profile lights.

MATERIALS

PVC panels · Al-Noor stone MDF · 10 mm aluminium U-profile · ZRK UV Lux

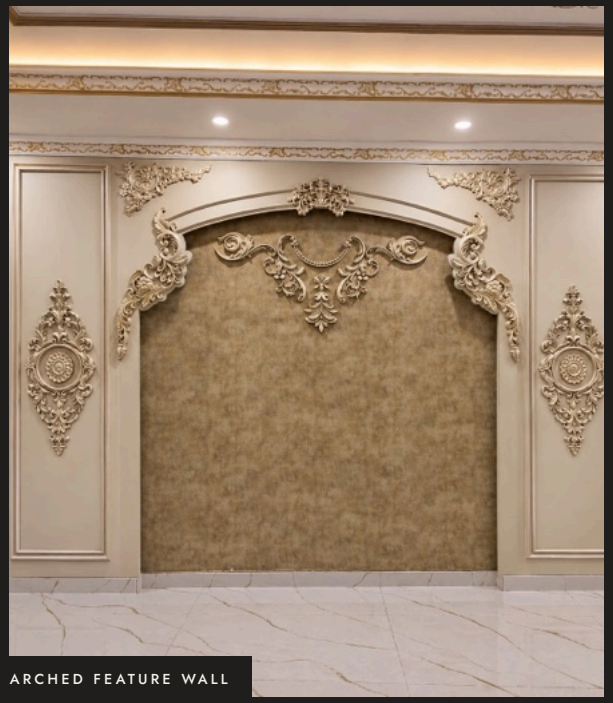

LOUNGE · CNC CARVED MOULDINGS

FOR DEVELOPERS AND CONTRACTORS

Ready for bulk and commercial projects

For apartments, housing schemes and commercial buildings we work to your drawings and schedule, and keep every unit consistent.

01

Site survey

Every kitchen and wardrobe measured on site before quoting.

02

Detailed BOQ

Technical and commercial proposal per unit type.

03

Same quality in every unit

Cut and edged by machine, so unit 1 matches unit 100.

04

Installation in phases

Fitted block by block, as per your site schedule.

05

One point of contact

One project manager from proposal to handover.

KITCHEN INSTALLATION IN PROGRESS

WHO WE WORK WITH

Homes, developers and businesses

Homeowners

Single rooms to complete homes, designed with you.

Contractors and builders

Reliable supply and installation to your schedule.

Commercial

Shops, offices and showrooms, including CNC signage.

Architects and designers

Your drawings, built accurately and finished well.

Developers

Bulk kitchens, wardrobes and doors with consistent quality.

Overseas Pakistanis

We manage your project end to end while you are away.

OUR COMMITMENT

Made as promised, or we fix it

If anything we make is different from what we agreed with you, we will come back and fix it.

100%

Made as agreed

We confirm the design, size, material and colour with you before we start. If the final work is different, we fix it.

12 hrs

Response time

If you call us after the work is done, we reply within 12 hours, often sooner.

0

Pending issues at handover

Before handover we check every item with you. All small issues are fixed before we leave.

WHAT WE FIX

- Anything different from the design we agreed
- Any fault in our work, found at or after handover
- Loose or uneven doors, drawers and hinges after fitting

GOOD TO KNOW

- Damage from water or wrong use is not included
- Work changed by another carpenter is not included
- New changes to the design are charged separately
